

SkyDrive Enters Business Partnership with Bangkok Airways, SPI and Saha Tokyu to Explore eVTOL Applications in Thailand
- Fours parties develop roadmap on routes, tickets sales and maintenance hubs in Sri Racha, Bangkok and Ko Samui -

TOYOTA CITY, Japan, July 23, 2026 SkyDrive Inc. ("SkyDrive"), a leading compact eVTOL (*1) aircraft manufacturer based in Japan, announced today that it has signed a Memorandum of Understanding ("MOU") with the following three Thai companies: Bangkok Airways Public Company Limited ("Bangkok Airways"), Saha Pathana Inter-Holding Public Company Limited ("SPI") and Saha Tokyu Corporation Company Limited ("Saha Tokyu").

Under this partnership, the four companies have produced a comprehensive eVTOL roadmap covering the exploration of routes in Sri Racha, Bangkok and Koh Samui, as well as the development of tickets sales and maintenance networks.

■ **Background to the agreement**

This latest agreement follows on from a first MOU, signed in June 2024 by SPI, Saha Tokyu and SkyDrive, to support studies into the feasibility of introducing the SKYDRIVE aircraft Thailand (*2). Now, Bangkok Airways, a major Thai airline, is joining together with the three original signatories to explore more effective, concrete commercial possibilities for SkyDrive's eVTOLs.

Bangkok Airways, which provides services within Thailand and between Thailand and neighboring nations, is a regional airline known for its "Asia's Boutique Airline" concept. As a provider of high-quality, customer-focused, personalized air travel, Bangkok Airways is keen to integrate eVTOLs into its route network. The airline, which has extensive knowledge and experience of the aviation industry, operates routes to major tourist destinations in Thailand, such as Trat, Sukhothai, Phuket, Chiang Mai, and Koh Samui. Owning and operating airports and hotels, including assets in Koh Samui, puts Bangkok Airways in a unique position to promote tourism development and harness its long track record in the tourism industry to drive the future growth of SkyDrive's eVTOL.

The addition of Bangkok Airways to SkyDrive's existing partnership with the Saha Group and Tokyu Group is a further step towards the establishment of next generation urban mobility infrastructure and a model of eVTOL use that links flights into the fabric

of the city. Success in Thailand will provide a springboard for the roll out of viable eVTOL networks in Japan, as well as in other nations such as Australia and Vietnam. The seamless integration of next generation urban air mobility into urban development programs will create advanced urban transport networks that can be adapted to fit major cities across the world.

■ **Collaboration over Strategies and Support for Commercializing eVTOL in Thailand**

The four parties to the agreement have agreed to work in stages to develop systems for supporting the development of eVTOL businesses in Thailand. These systems, which will harness existing infrastructure and the cooperation of other local partners, will lay the groundwork for the sale of eVTOL aircraft and their future commercial operation.

We will first work together over the exhibition and demonstration of the aircraft, giving potential customers the opportunity to learn more about eVTOL and move towards purchase commitments. We will also determine the support systems required to achieve the smooth sale, storage and maintenance of the aircraft, as well as the training of pilots and other personnel, as fleet size and flight frequency increases.

The four parties will also investigate how, in the longer term, a wider range of business functions could be relocated into local markets as required by demand trends and market maturity.

■ **Flight Routes**

Under this agreement, the four signatories will start to assess and select specific flight routes within Thailand, focusing on alleviating traffic congestion and improving passenger access and convenience to a variety of destinations. We will also work to develop sightseeing flight options, leveraging the aircraft's potential to stimulate further demand in the tourism industry.

- **Sri Racha:** Routes under consideration include a network linking Saha Tokyu's J-Park/HarmoniQ development (upscale residences designed primarily for the families of Japanese people living and working in Thailand) with outlying islands and tourist attractions in Koh Sichang, Koh Lan and Pattaya.
- **Bangkok:** In the medium and long term, the four signatories are looking to develop air taxi routes linking central Bangkok, and residences such as Kings Square Residence, with Suvarnabhumi International Airport. Using our aircraft to provide regular daily journeys in speed and comfort will allow residents and other passengers to bypass Bangkok's chronic traffic congestion, maximizing the potential value of the destinations served.
- **Koh Samui:** The parties to the agreement will seek to operate sightseeing eVTOL flights that leverage the beauty of Koh Samui's world-renowned natural scenery. We will also examine the potential for fast and reliable air mobility services

between Koh Samui's airport and its various resorts, allowing tourists to reach their destinations in comfort without the inconvenience of traffic congestion or long boat rides.

Proposed flight routes in the Si Racha District

Comments

Mr. Puttipong Prasarttong-Osoth, President of Bangkok Airways Public Company Limited States

This partnership marks an important milestone for Thailand's aviation industry. The introduction of eVTOL technology represents a new innovation for Thai aviation, opening opportunities to rethink how we connect cities, airports, and key tourism destinations in a more efficient and environmentally responsible way. As a fully integrated aviation service provider, Bangkok Airways is well positioned to explore how the SKYDRIVE can complement our existing route network and airport infrastructure, particularly in destinations such as Samui, Sukhothai, and Trat. While this initiative is still at the study stage, we are ready to further examine the operational, regulatory, and commercial frameworks necessary to support future eVTOL services in Thailand. We believe this collaboration reflects our commitment to innovation and our responsibility to help shape the next chapter of sustainable air mobility in the country.

Vichai Kulsomphob, Executive Chairman & CEO of Saha Pathana Inter-Holding Public Company Limited

We are honored to support the strategic collaboration among SkyDrive Inc., Bangkok Airways, and Saha Tokyu Corporation, marking a significant step toward advancing sustainable air mobility in Thailand. This partnership represents important progress in the development of eVTOL operations—an innovative solution poised to transform transportation while reducing environmental impact. As a committed partner, we will provide close coordination and support to help establish a strong foundation for future commercial deployment. Through this collaboration, we aim to foster innovation, enhance connectivity, and contribute to Thailand's long-term economic and social development, shaping a smarter and more sustainable future for the country.

Masahiko Nishimoto, Managing Director of Saha Tokyu Corporation Company Limited

Saha Tokyu Corporation Company Limited, which celebrated its 10th anniversary in 2024, is dedicated to developing living environments in Sriracha, Thailand, a hub for Japanese manufacturing companies. We are honored to be part of this initiative, which will allow us to explore business opportunities in Thailand in collaboration with Bangkok Airways, SPI, and SkyDrive, a leading Japanese eVTOL aircraft manufacturer. Together, we will investigate operational applications for SkyDrive's aircraft, supporting SkyDrive's expansion into Sriracha, Thailand and contributing to regional development. We believe this initiative will significantly benefit Thai society, and its economy and we intend to play our part by offering real estate services, including housing and workspaces, as eVTOL helps Thailand's regions to grow.

Tomohiro Fukuzawa, CEO of SkyDrive Inc.

We are truly honored to announce our partnership with Bangkok Airways, Saha Pathana Inter-Holding, and Saha Tokyu, three of Thailand's leading companies. As rapid economic growth continues, Thailand faces critical challenges including chronic traffic congestion and environmental pollution caused by vehicle emissions. Since 2024,

we have been working with Saha Pathana Inter-Holding and Saha Tokyu to explore how “SKYDRIVE” our compact, zero-emission eVTOL, can help resolve these issues. With the additional participation of regional airline Bangkok Airways, a company with extensive expertise in operations and tourism development, we will be able to accelerate studies of concrete flight routes and services. Moving forward, the four companies will work closely together to bring the commercial operation of our eVTOL aircraft to Thailand.

About Bangkok Airways Public Company Limited

Bangkok Airways Public Company Limited operates a fully integrated aviation business encompassing airline operations and airport-related services. Recognized as an award-winning regional full-service airline, the Company plays a key role in connecting major domestic and regional routes across Thailand and Asia.

Bangkok Airways owns and operates three airports in Thailand, Samui Airport, Sukhothai Airport, and Trat Airport, and provides vital air connectivity to key leisure and economic destinations, including Samui, Phuket, Chiang Mai, Krabi, Trat, Siem Reap, Phnom Penh, and other major cities in the region.

The company’s airport-related businesses also include in-flight catering services, the supply of ground support equipment in accordance with international standards, and the operation of international air cargo terminal services.

About Saha Tokyu Corporation Company Limited

Saha Tokyu Corporation Company Limited is a joint venture company between Tokyu Group in Japan and the leading consumer goods manufacturing conglomerate in Thailand. The company was established on 1 October 2014. The company is presently engaged in the development of residential housing, serviced apartment and focused on delivering high quality, best housing property and service for Japanese and families

in Sriracha, Chonburi. Saha Tokyu is headquartered in Sriracha, Chonburi. Masahiko Nishimoto is the Managing Director of the company.

About SkyDrive Inc.

SkyDrive is a Japanese eVTOL company aiming “to take the lead in the once-in-a-century mobility revolution”. The company began testing eVTOL prototypes in 2014 prior to official incorporation in 2018. Under its future vision for urban transportation, flying in eVTOLs will become a regular part of city life. In 2019, SkyDrive became the first company to fly a crewed eVTOL in Japan. In 2025, the company successfully showcased the eVTOL “SKYDRIVE”, the company’s first eVTOL product, with demonstration flights at the Osaka Expo witnessed by thousands of visitors over a one-month period. SkyDrive began production of “SKYDRIVE” in March 2024 at a plant owned by Suzuki Motor Corporation, SkyDrive's official production partner. SkyDrive has been working with civil aviation authorities in Japan and the US to obtain certification for “SKYDRIVE”, with the aim of launching the aircraft into service in 2028. SkyDrive is headquartered in Toyota, Aichi Prefecture, and led by CEO Tomohiro Fukuzawa, an engineer and entrepreneur.

Editor’s Notes:

(*1) “eVTOL” is an abbreviation for electric Vertical Takeoff and Landing. As the name suggests, eVTOL aircraft can take off and land without a runway. eVTOLs are powered by electricity and incorporate advanced, automatic, flight control technology.
